MARCO MOMI

NEUE WERKE FÜR
KLASSISCHE GITARRE
& ELEKTRONIK

Xylem is one of the two types of transport tissue in vascular plants and its basic function is to transport water and other nutrients from roots to stems and leaves. The best-known xylem tissue is wood. This project aims to bring new sap to the classical guitar wood grains. Moving up from the roots of a declining instrument, fighting against today's temporary trends, pointing at a lash not-beaten path ...

Cathy van Eck
(*1979, BE)

Music Stands (2011)
for performer, music stands, small loudspeakers,
contact microphones and live electronics
